Jubel & Baluba. Cherful sewing

Original title: Jubeldeøm & Balubasøm
Publisher: Gyldendal Forlag 2021
Non Fiction / Hobby/Hand craft

Jubel & Baluba's first sewing book took the market by storm, and finally the sequel is coming! This time, in addition to models in the well-known Jubel & Baluba style, they have moved into a world of solid fabrics and sewing patterns adapted to these. Here you get a good mix of cool clothes in elastic fabrics and nostalgic and romantic models in solid cotton fabrics.

Jubel & Baluba. Cherful sewing, contains over 35 different models in sizes 50–170. The book is suitable for anyone who is a total beginner, more advanced or something in between. The models range from the very simple to the more detailed, with good step by step descriptions and a section with sewing instructions and with explanatory photographs. Of course, full-size pattern sheets are included.

Do you need clothes for the baby , or do you need practical clothes for the toddles? Do you maybe have kids going to their first Christmas ball, or maybe a teenager? Jubel & Baluba wish to include all of them.
